

SUTPHEN

Heavy Duty Custom Pumpers

FAMILY OWNED
SINCE 1890

Purchasing a heavy duty custom pumper shouldn't be complicated. You shouldn't have to choose between levels of quality, or compromise heavy duty material and durability. Sutphen makes custom easy. The custom quality and dependability you've come to know and trust from Sutphen extends throughout our Heavy Duty Custom Pumper offerings. With a wide variety of body, pump module, tank, ladder storage, and hose bed options, you can be sure that we can build a truck that meets your needs at a price that fits your budget.

SUTPHEN HEAVY DUTY CUSTOM PUMPER

APPARATUS BODY

- CONSTRUCTION:** Heavy duty, corrosion resistant, #304 Stainless Steel, or 3/16" Extruded Aluminum
- DOORS:** ROM roll up doors painted or satin finish, hinged doors optional
- HOSEBED:** Capacity for up to 1500' of LDH
- LADDERS:** Full NFPA pumper compliment of ladders
- LADDERS STORAGE:** Options of ladder chute, electric ladder rack, hydraulic ladder rack, or bracket mount.
- BOOSTER TANK:** 500-1500 gallon water tank capacity
- AIR BOTTLE STORAGE:** Capacity for up to 7 air bottles stored in the fender wells
- COMPARTMENT SPACE:** Body options featuring up to 300 or more cu. ft of usable compartment space

PUMP/TANK

- Hale, Waterous, or Darley pumps available. 1500-2000 gpm mid-ship mounted with options for rear mount pumps.
- STANDARD DISCHARGES:** (2) 2.5" left, (1) 2.5" right, (1) 3" right, (2) 2" crosslay, (1) 2.5" right rear
- Multiple options for foam and CAFS systems. Stainless steel pump plumbing. Custom or pre-engineered pump plumbing options. Easily repairable poly tank with lifetime warranty is standard.

CHASSIS

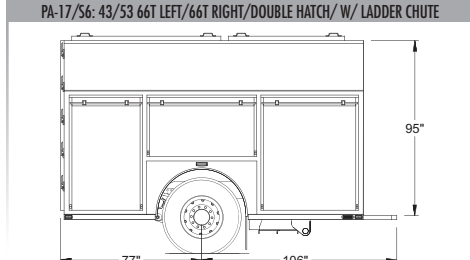

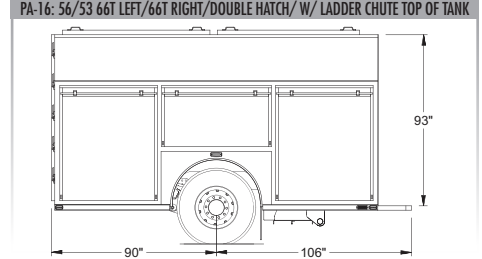

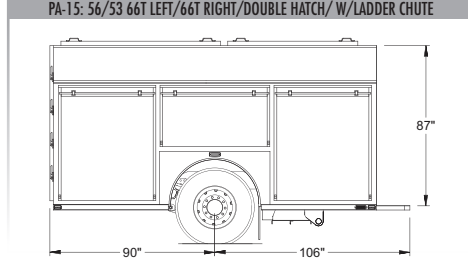

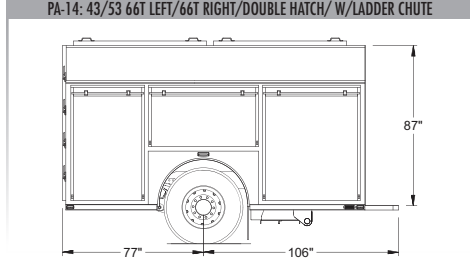

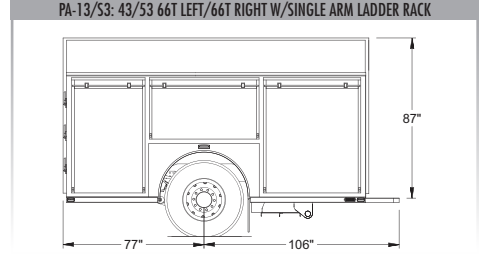

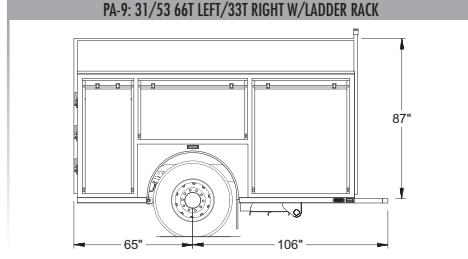

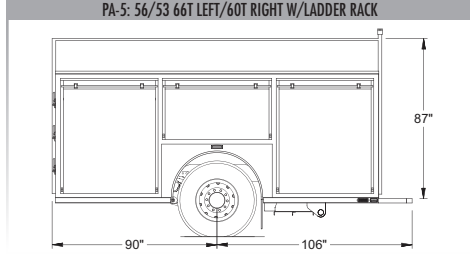

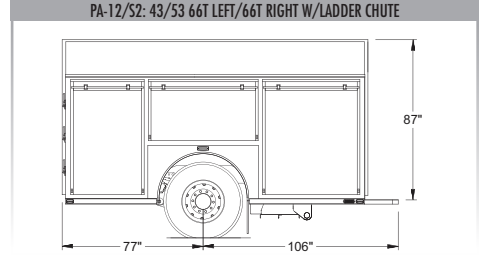

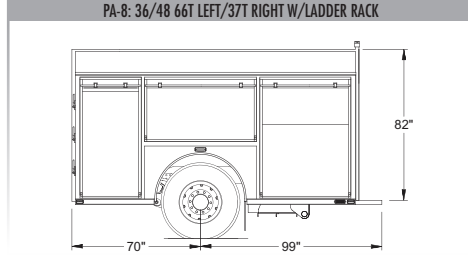

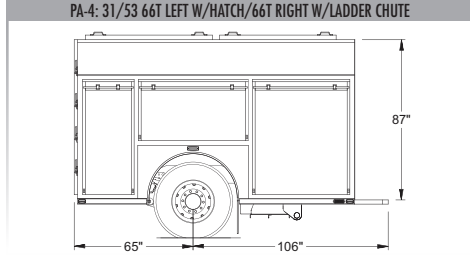

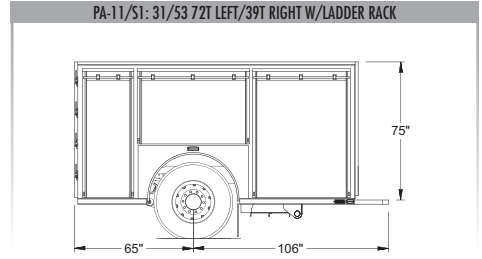

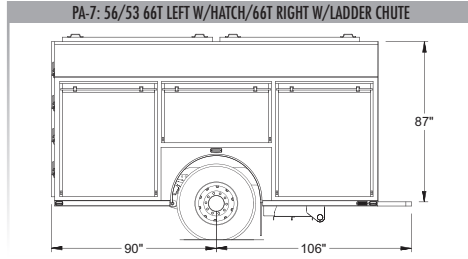

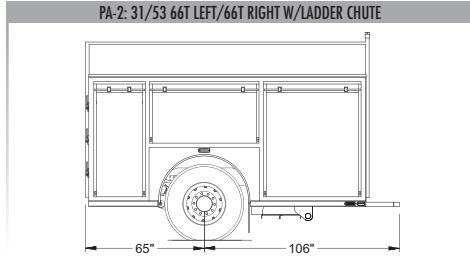

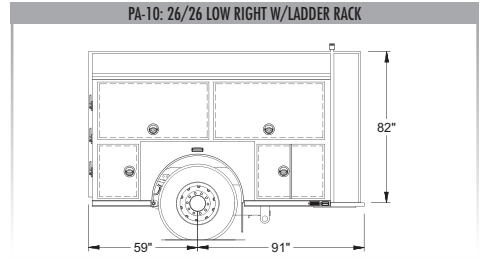

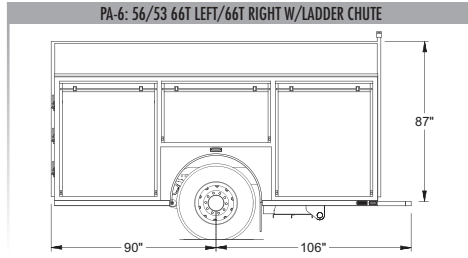

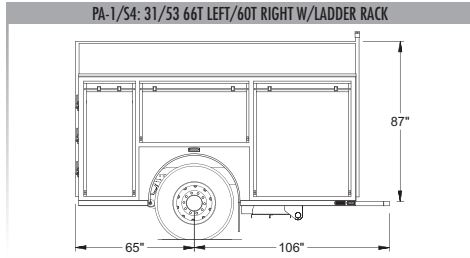

- All Sutphen Heavy Duty Custom Pumpers are equipped with our top of the line Monarch Severe Duty Chassis or on Commercial Chassis

BODY/PUMP PANEL FEATURES

- Full vertical integration. The cab, chassis, and body are built and designed entirely by Sutphen.
- Double frame rails the entire length of the chassis.
- Heaviest rear body sub-structure in the industry.
- The frame is heavily reinforced at the pump module area for greater strength.
- Easily access the pump area through the large top hinged pump access door at the left side pump panel.
- Recessed pump panels keep suction accessories from protruding, and the valves are mounted directly to the pump behind the pump panel.
- Heavy duty body construction available in #304 Stainless Steel, or 3/16" Extruded Aluminum, and the body is Huck-bolted to the sub-frame providing excellent strength and rigidity.
- Body compartments are large, full depth and provide ample storage space for rescue tools and equipment.
- Compartment interiors are maintenance free, don't require painting, and reflect light for better visibility.
